

UNI Sustainable Single Gas Detector

Reusable portable detector for O₂ and toxic gases

The WatchGas UNI is a compact, easy to use single gas monitor that is available with a wide range of sensors.

The UNI offers a simple portable solution for a wide array of toxic gases and O₂ applications. With a large LCD screen, the UNI provides maximum readability in the field. Six bright red LEDs and a loud beeper provide unmistakeable alarm notification. It even has a built-in vibration alarm, for extra peace of mind in noisy work environments and when working with hearing protection.

The UNI is constructed using strong and durable materials, to provide protection in the harshest of environments. It also rests easy in your hand, with a grippy, rounded surface for optimal useability even when wearing multiple layers of protective clothing.

The UNI series can easily be bump tested and calibrated with the WatchGas CaliCase system.
